

## OVERVIEW

The objective of the Health Check program is to help clients be as successful as possible with their existing Alluxio deployments. This includes a review of the Alluxio deployment architecture, application, and operational practices. Our Alluxio expert will work with client architects and developers to assess changes needed in order to provide a performant, available, and functional service.

## ENGAGEMENT APPROACH

This program is provided on-site as a two-day engagement. The typical approach for a Health Check engagement is as follows:

- An initial meeting is held remotely to understand the client's application and discuss the desired focus of the engagement.
- Alluxio Consultant will request prerequisites based on the focus of the engagement, including architecture diagrams and configurations to prepare for the on-site engagement.
- On-site engagement dates are planned, and logistics are discussed with clients.
- On-site engagement follows. All discussions here will be confidential and information is collected only to help with architecture, data design, and sizing recommendations.

## DELIVERABLE

This will include a report with all the recommendations reviewed with the client on-site and any additional recommendations.

## TIME AND DURATION

This engagement provides up to a total of 2 days of Alluxio consultant time on-site. An additional 8 hours of remote time is included for deliverable creation and review.

## EXPENSES

Reasonable travel and expenses incurred in conducting on-site activities at the client's site shall be billable to and paid by the client upon receiving invoice with expense report and receipts if required.
