

## OVERVIEW

The objective of the POC Support program is to give clients clear guidance, best practices, and a specific plan to successfully run a targeted POC focused on solving a specific business or technical problem.

Specifically, this service includes:

- Use Case analysis - understand the problem that is being solved.
- A review of the desired Application topology and overall system requirements.
- Alluxio Setup including integration with Storage and Big Data frameworks
- Sizing exercise
- Definition of Success criteria and how best to measure and capture these from the test system.
- POC Plan

## ENGAGEMENT APPROACH

This is provided as a 6 week program with weekly working sessions with Alluxio Consultant and Client to move forward with the Proof of Concept.

- An initial meeting is held to understand the client's application and discuss the desired focus of the engagement.
- Alluxio Consultant will request prerequisites based on the focus of the engagement, including architecture diagrams and system/network/security configurations to prepare for the engagement.
- Engagement dates are planned, and logistics are discussed with clients.
- Engagement support is provided on going for the duration of the program.

## DELIVERABLE

This will include a report that lays out the Business challenges and goals of the POC, Technical overview and Results.

## TIME AND DURATION

This engagement provides up to a total of 6 days of Alluxio consultant time on site or remote to support the POC. An additional 10 hours is included for deliverable creation and review.
